Solutions to improve your business

Organization:

Imtech Automation Solutions combines know-how of manufacturing, information technology, software packages and tools to agile solutions enabling effective production management.

Business Unit structure:

Imtech Automation Solutions is part of Imtech N.V., a European technical service provider in the field of information & communication technology and electrical and mechanical engineering.

With more than 15,000 employees Imtech realizes an annual turnover of approximately 2,5 billion euro. Imtech is able to offer customers measurable added value by providing high-quality total technical solutions. We distinguish ourselves with a multi-disciplinary approach by offering one-stop-shopping, covering the entire range from advice and design to construction, maintenance and management. This allows you as a customer to focus better on your own core activities. You and Imtech: shared success!

Knowledge & Ability:

Automation Solutions provides an integrated package of ICT-services focused on consultancy/project management, software services and system maintenance in the area of industrial automation, manufacturing execution and information management.
